

Medius™ - SCM is built on years of procurement and data management experience by the industry for the industry. Medius provides companies the ability to manage their supply chain, track contracting, generate product reports, automate workflow and more. With no hardware to buy, it's as simple as setting up an account. Medius manages the complexity of collaboration by connecting your entire organization and your complete supply chain network with live data.

Procurement Efficiency

Access to real time data allows for smarter decisions and a more efficient workflow. Medius automates the redundancy of procurement allowing you to grow your business without growing your overhead.

Collaborative Accuracy

Working together you can build a network of traceability and accurate data collection along with your transportation network and suppliers.

Global Accessibility

With its easy to access and secure interface, Medius provides companies with the ability to manage their data from any location.

Amazon® Web Services

Reliable and secure, Medius is powered by Amazon® Web Services. Built on AWS to give you the most reliable access to your data anywhere in the world.
